

BECOME A MEMBER

Founded in 1972, the Steel Erectors Association of America (SEAA) is the only national trade association representing the interests of steel erectors, fabricators, and related service providers.

Steel Strong

SEAA members represent both small businesses earning under \$3 million per year as well as large corporations generating more than \$10 million per year. Working in both unionized and open labor markets, members share a broad range of expertise in the construction of single and multi-story buildings, arenas, bridges, and rail and highway structures. Many are award-winning organizations, recognized for their contributions to the environment, safety, and the industry.

Connecting Leaders, Creating Community

SEAA's objectives include the promotion of safety, education and training programs for steel construction trades, the development and promotion of best practices and standards, advocacy for the industry, and cooperation with others in activities which impact the commercial construction business. SEAA invests in forward-thinking industry improvements. SEAA Members strengthen each other with meaningful connections and strategies.

CORE VALUES

Trailblazing

We tackle the future by investing in forward-thinking improvements for our organization and the industry.

In It Together

We invest in each other by networking nationally, creating meaningful connections for members, and strengthening relationships in the steel construction community.

Up Your Game

We provide education that will elevate your company now and prepare your company for the future.

Enrich Members

We create a positive ROI because of the relationships and education we bring to our members and our industry.

BENEFITS OF MEMBERSHIP

- Listing in the SEAA Membership Directory and Certificate of Membership.
- Access to Member-Only resources, including NCCER sponsored craft training program, DOL Approved Apprenticeship Standards, job board, learning management system, training videos, peer groups, and similar tools.
